

IVERY TOWERS

The logo for 'Ivery Towers' is centered in the image. It features the title in a stylized, metallic, serif font with a blue glow. The text is set against a dark, jagged, shield-like background. Behind the text, a tall, ornate castle tower with multiple windows and a crenelated top is visible. The entire scene is set against a dark, stormy sky with swirling clouds and several bright lightning bolts striking down. On the left side, the dark, gnarled branches of a tree are visible. The overall mood is mysterious and ominous.

SOULSTREAM

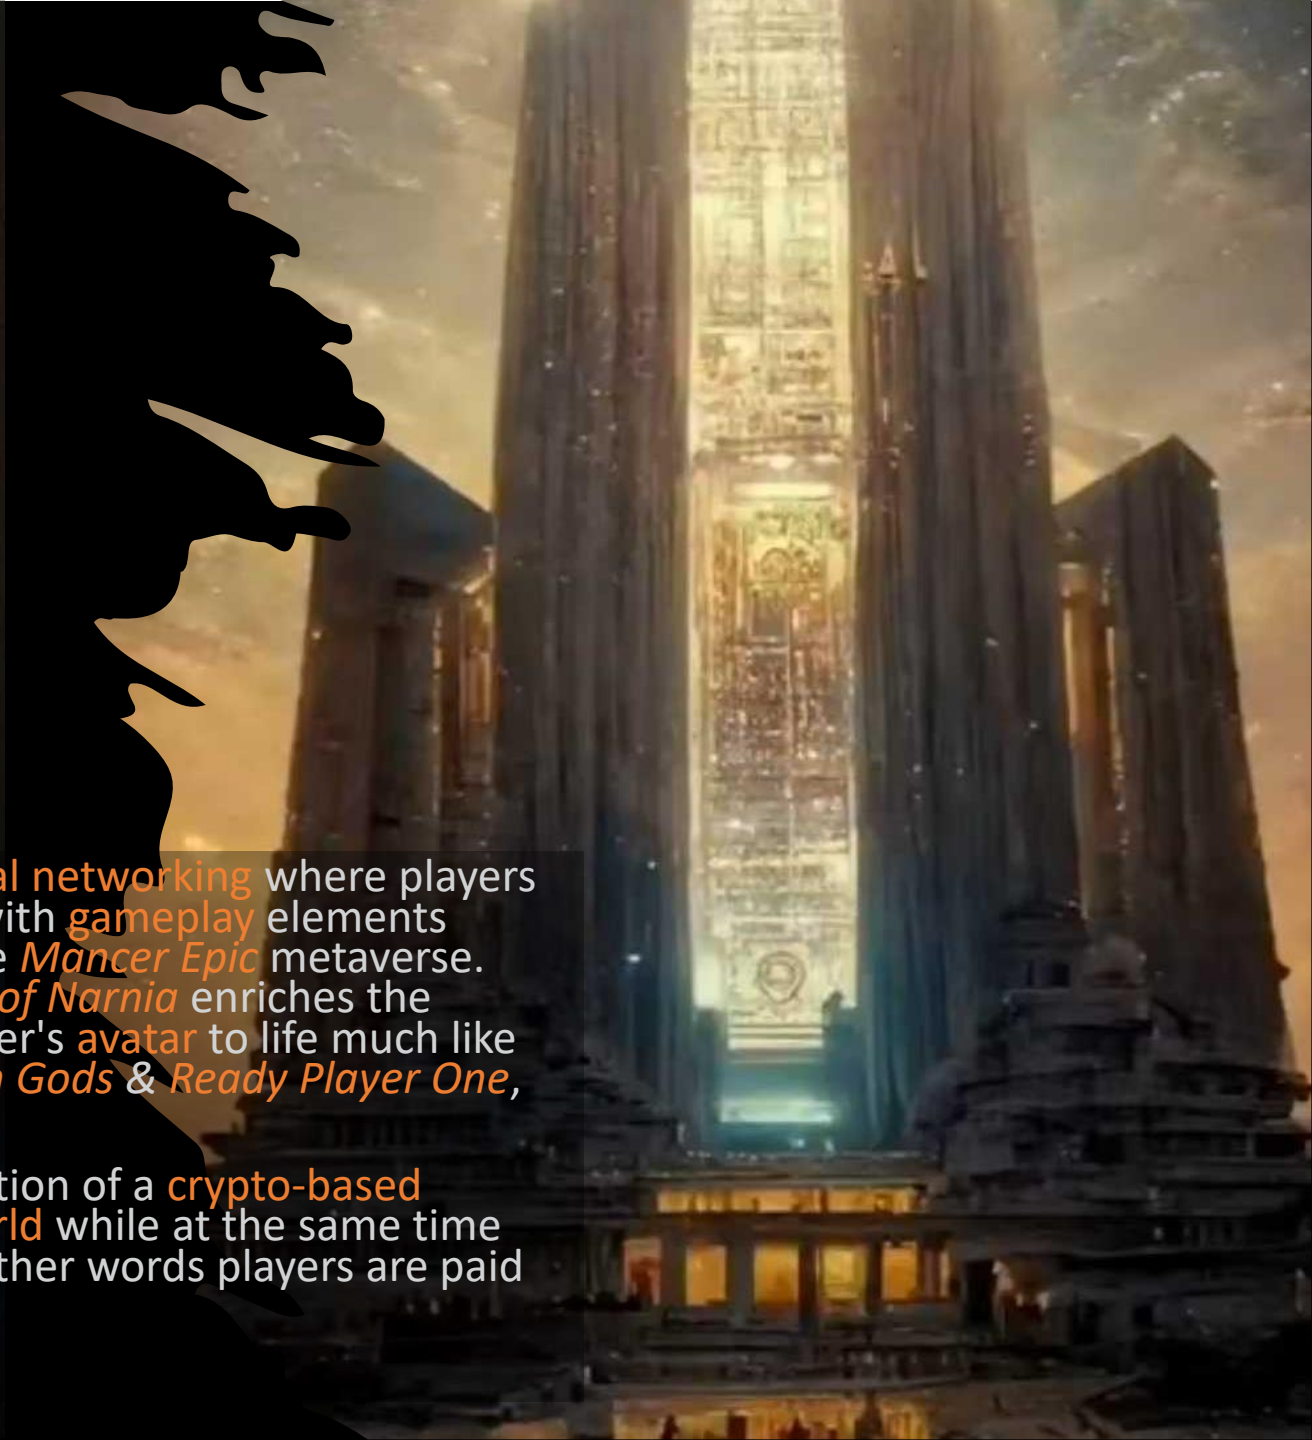

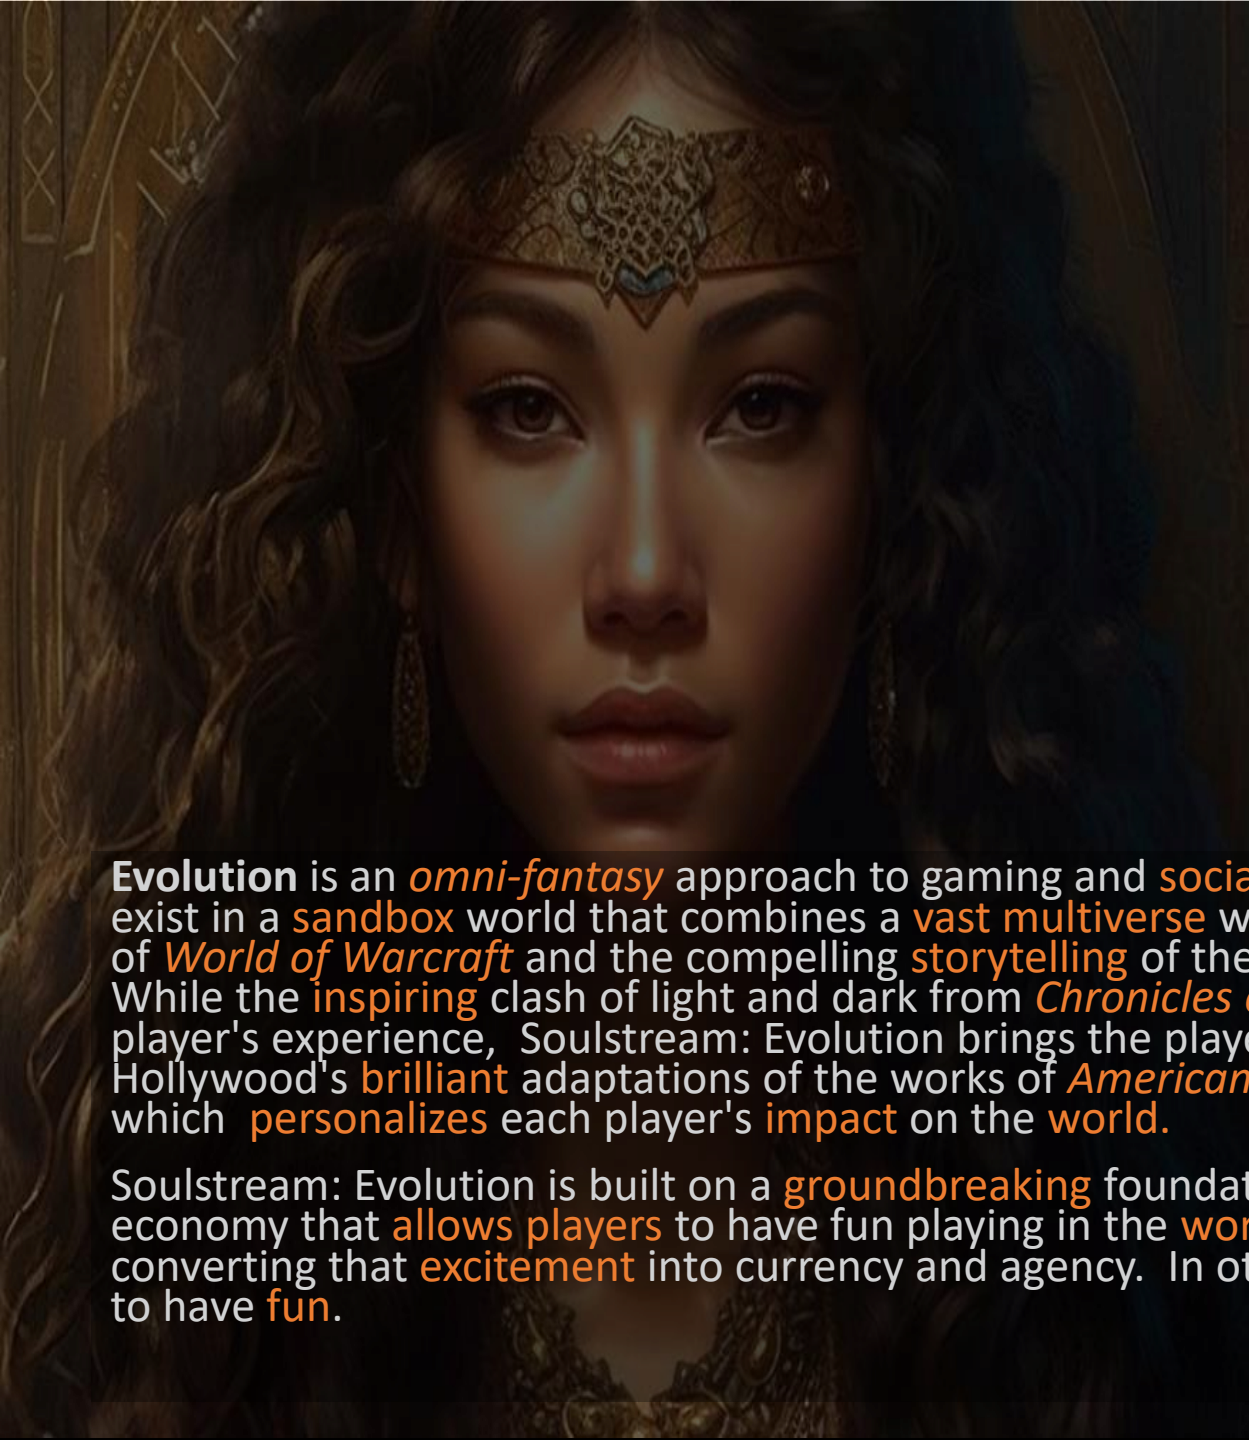

Evolution

*Whether you are a Hero, Villain, Crafter,
Warrior, Socialite or Loner*
**Your Destiny awaits in Soulstream
Evolution!**

GEO IVERY

Evolution is an *omni-fantasy* approach to gaming and *social networking* where players exist in a *sandbox* world that combines a *vast multiverse* with *gameplay* elements of *World of Warcraft* and the compelling *storytelling* of the *Mancer Epic* metaverse. While the *inspiring* clash of light and dark from *Chronicles of Narnia* enriches the player's experience, Soulstream: Evolution brings the player's *avatar* to life much like Hollywood's *brilliant* adaptations of the works of *American Gods & Ready Player One*, which *personalizes* each player's *impact* on the *world*.

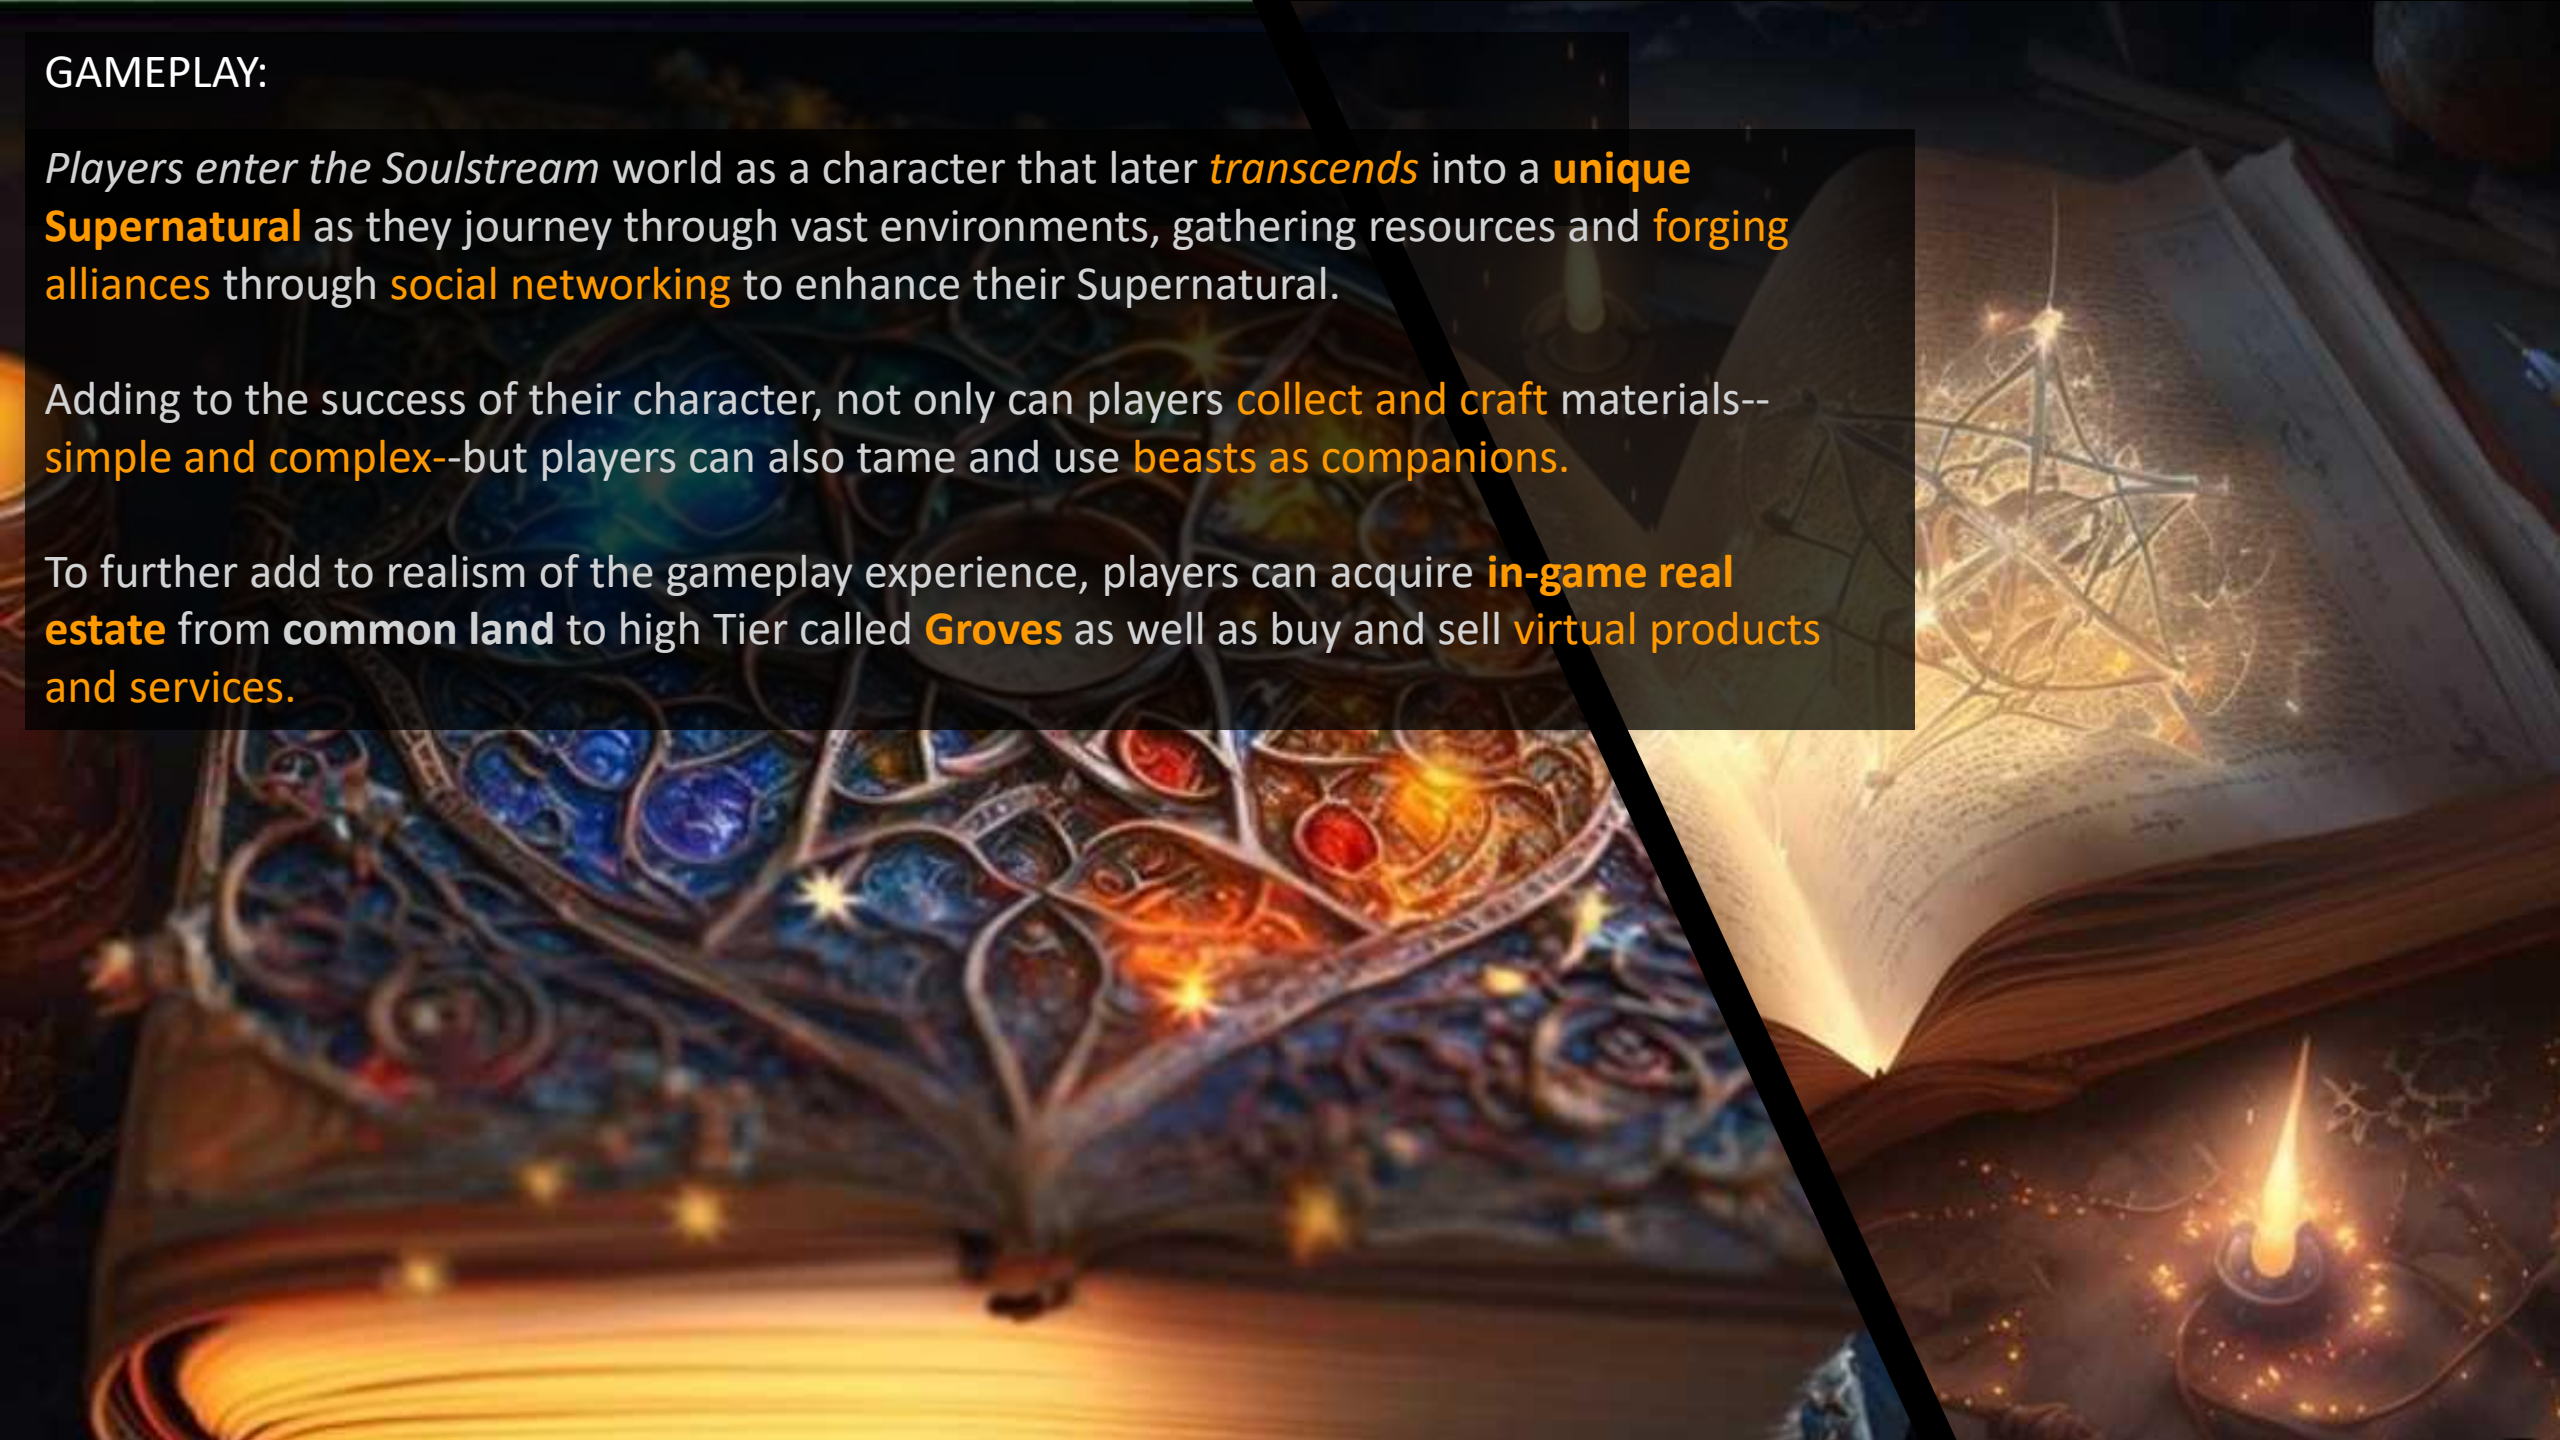

Soulstream: Evolution is built on a *groundbreaking* foundation of a *crypto-based* economy that *allows players* to have fun playing in the *world* while at the same time converting that *excitement* into currency and agency. In other words players are paid to have *fun*.

GAMEPLAY:

*Players enter the Soulstream world as a character that later **transcends** into a **unique Supernatural** as they journey through vast environments, gathering resources and **forging alliances** through **social networking** to enhance their Supernatural.*

Adding to the success of their character, not only can players **collect and craft** materials--**simple and complex**--but players can also tame and use **beasts as companions**.

To further add to realism of the gameplay experience, players can acquire **in-game real estate** from **common land** to high Tier called **Groves** as well as buy and sell **virtual products and services**.

Gameplay: Characters

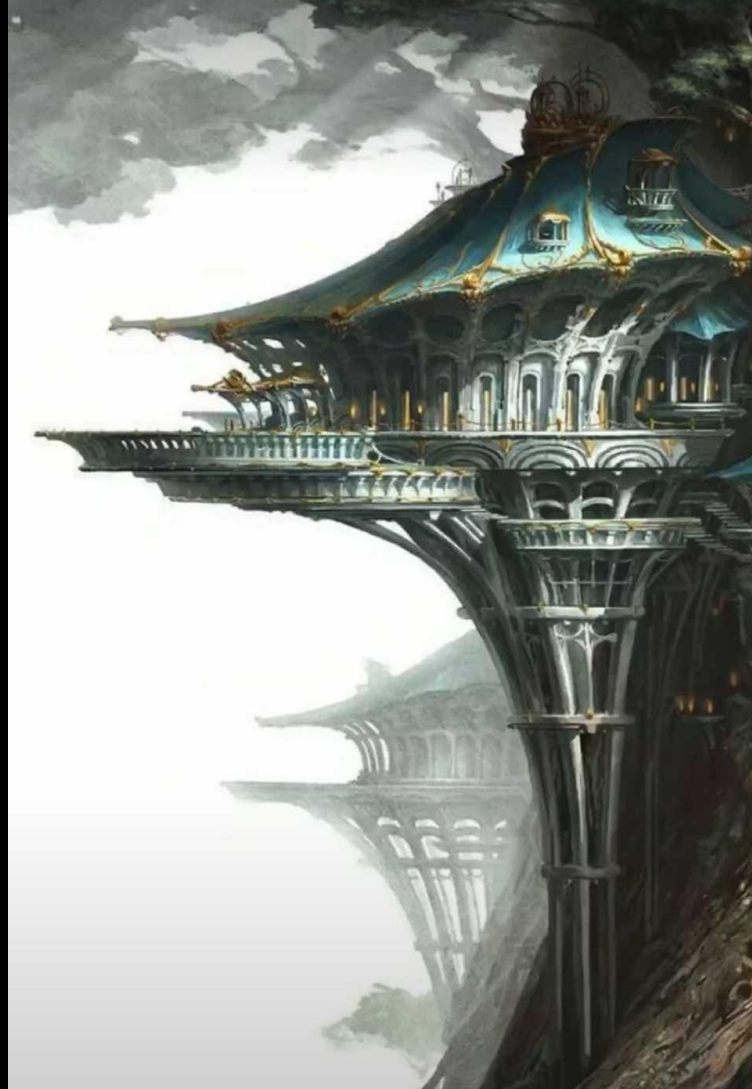

Your character in Soulstream is **A.I Generated** and can be tailored to the players **unique** features, **personality**, and interests. Offering an **amazing once in a lifetime** connection between the **player**, **their activities** in **the world** which will drive their interest in playing, **investing time-money** via the crafting marketplace, **evangelizing**.

Gameplay Personalization, *Emotion*, and the *Freedom* to express your *Supernatural alter-ego*. Your character in Soulstream is going to be an important part of each player's *unique experience*. The *more information* you give the A.I. the *greater* of a *chance* you get your favorite *Supernatural archetype*. Everything from your Astrological sign to the physical features you choose will all be responsible for the RNG (Random Numbers Generated) decision of which **Supernatural powers** you unlock. Basically A.I. rolls the dice on your fate based on all data. Every Supernatural in game gets their own **Spell trees and Ability Trees** as well as **Tiers** from **E rank to SSS rank** which add to the excitement and wonder of the *journey*. With so many variables *no two players will ever be identical*.

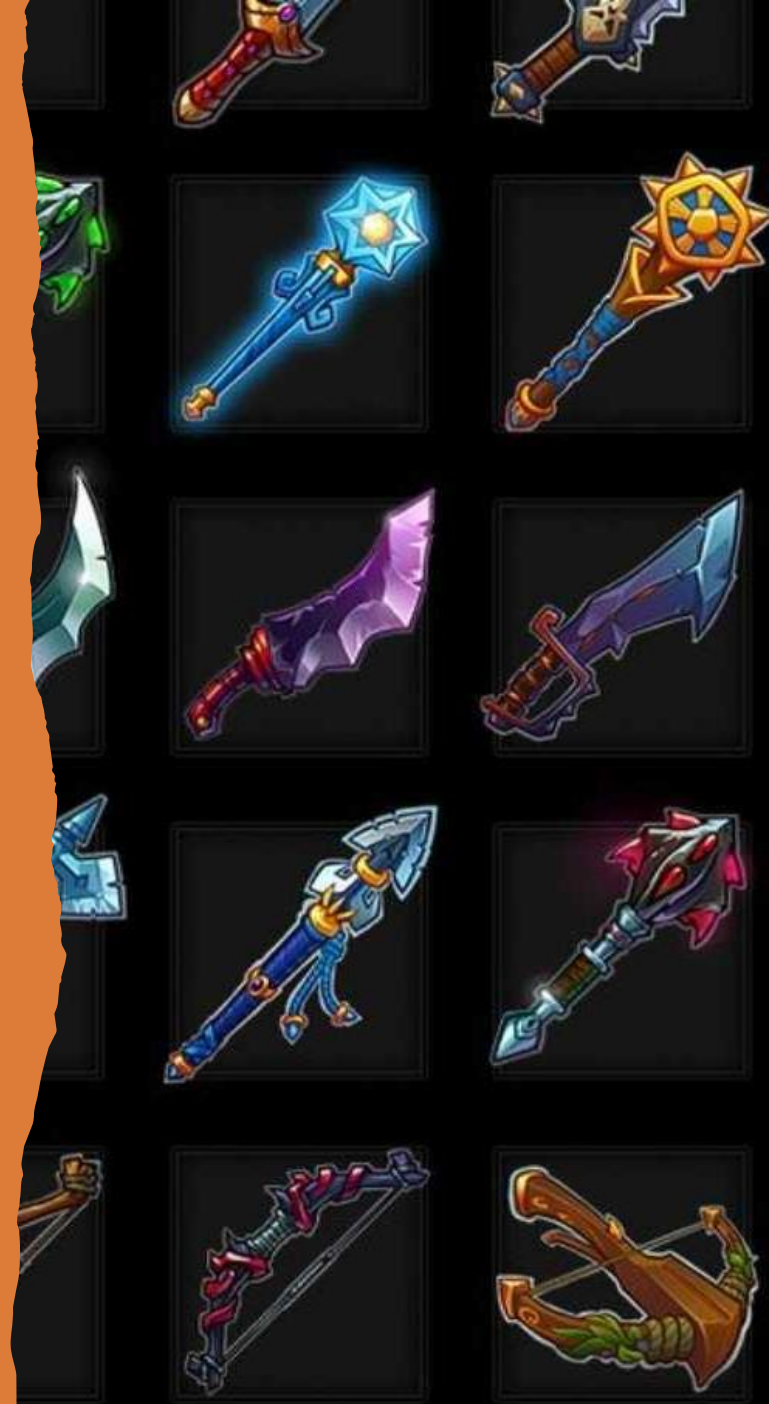

Worlds The worlds of Soulstream: Evolution will feature the best in **A.I. Generated procedural graphics**, and state of the art **production techniques** that will leave players **gasping**, and their friends (and soon to be evangelists)- **breathless**. From safe zone Cities that evolve with the player base to **dangerous** monster ridden common areas and all sorts of **pocket dimensions**. This is one of the most important aspects of the **Soulstream universe**. Interactive and **evolving environments** all managed by the **world-renowned** Art Director and **inventor** of the world building used in SONY's **GOD OF WAR** franchise, **Terry Smith**.

Magical Items All items in Soulstream: Evolution found by players are considered Magical items. Players will be able to find these Magical items by *completing quests, unearthing random items while gathering and or defeating foes as well as create their own and buy/sell them on the marketplace offline and online.* All items are considered NFT's and like players will have **Tiers from E to SSS** as well as **rarity**. These items will be responsible for millions of transactions per day. This combined with the *Tokenomics, Burn and Soulstream Coin Guarantee* will **change the Defi space**. Magical items will change the player's personal journey as they will add powers, stats and abilities that may aid the player to achieve more victories. Not all items are created equal so players will be picky about *looks, effects and powers*. From finding powerful weapons to beautifully crafted and enchanted gear, each player will have to decide what works for them. Some items on the market will be used in recipes for crafting.

Monetization Soulstream is art. It's a thriving marketplace with robust virtual currency that has the potential to drive wide interest in those crypto-focused transitions built within the web3 & cryptocurrency trading rules. (Everything else was on point)

1. Subscription \$15-20 / mo or \$150 / yr
2. Purchasing in game content /NFTs
3. Buying the Soulstream coin
4. Staking 1/3/5/10 years
5. Marketplace transactions between players online and offline
6. Black Market rare items only online Subscribers have access to
7. Passive income through tokenomics/ burn / for every transaction
8. The impact of this game will 100x the Safemoon platform

Soulstream: Evolution – WEB3 & Competition

We promise to bring **a world** the likes of which **no one** has seen before. With **Ivery-nomics** keeping the world spinning.

Like the giants we stand on the shoulders of **World of Warcraft**, Final Fantasy, Eve online and other **crypto plays** in games like **Axies**, **illuvium** and **Snoop Dogs –The Sandbox-**, with **strategies** using NFTs to keep players constantly involved in the **evolutionary** process of the game.

SOULSTREAM – EVOLUTION: Audience

Soulstreams **focus** is to create an **enterprise** with clear and **well-defined** areas of the **marketplace** where **trading activities** need to be **off limits** to minors, but who can still enjoy the game via conversions to in-game currency or another fiat:

- Core audience: Males & Female **gamers**, who love **fantasy**, action **adventure**
- Gameplay focus: **Fantasy** adventure based, **sandbox** dungeon **crawler**
- Platform: Meta Quest 2, Apple Vision Pro, PC & Mobile

SOULSTREAM: Schedule & Development timing
